Advisory for DD Kisan dated 12.03.19 (Agromet Advisories mentioned in the inputs are prepared by different Agromet Field Units in the country)

Significant Weather Features

- A fresh Western Disturbance (along with an induced cyclonic circulation) and wind confluence between westerlies & easterlies (at lower levels) over Central India & adjoining northern plains are very likely to cause fairly widespread to widespread rain/snow over Western Himalayan Region (WHR) and isolated to scattered rainfall over Punjab, Haryana, Chandigarh & Delhi, Uttar Pradesh, north Rajasthan, Madhya Pradesh and Chhattisgarh on 13th & 14th. Thunderstorm accompanied with hailstorm, lightning & gusty winds at isolated places are also likely over WHR & Punjab on 13th & 14th and over Haryana, Chandigarh & Delhi, Uttar Pradesh and north Rajasthan on 14th. Thunderstorm accompanied with lightning & gusty winds are likely over the remaining parts of Northwest & Central India on these two days.
- The wind confluence zone is likely to shift eastwards from 14th evening leading to a likely increase in rain/thundershower activity over East & Northeast India on 14th & 15th. Isolated to scattered/fairly widespread rainfall likely over Jharkhand, Gangetic West Bengal and adjoining areas of Odisha & Bihar on 14th & 15th with isolated thundersqualls and lighting over these regions during this period.

Realised Rainfall / Snow

(From 0830 hours IST of yesterday to 0830 hours IST of today):
